IRANIAN OFFSHORE OIL CO.

In the name of God

**To whom it may concern**

We hereby announce that M/S AMID Engineering and Development Company, the local consultant engineering firm together with M/S Pegasus Qeshm, as a Joint Venture has successfully performed the Pre-FEED/FEED engineering studies for renovation and reconstruction of RESALAT (R1) OFFSHORE COMPLEX (a complex of offshore oil production platforms, located in Persian Gulf - damaged during the Iran-Iraq war), followed with preparation of individual EPC packages/Tender documents for the next phase of the Project to be executed by others.

AMID scope of services in this project were consisting of Marine survey and Geo-technical soil investigations (subcontracted to Fugro) and linear and non-linear analyses and verification of existing offshore structures and facilities followed with DnV (the certifying authority) approval.

The Pre-FEED/FEED engineering studies were successfully accomplished during July 2005.

This confirmation is issued per AMID Engineering and Development Company request for presenting to others as referenced job.

Gh. A. Jowkar

**Director, Engineering and Construction  
Iranian Offshore Oil Company**
